

Not 100% confident of the reset circuit schem.  
But it's pretty close, if not quite right.

Schem drawn by R. Grieb Tauntek.com 2016  
This schematic drawn from through-hole version of pc bd.  
It may contain errors.  
Pin names shown for Ensoniq chip are mine, based on their connections.  
I only drew a few of the coil circuits. The others are the same.
