

**Notes:**

- SRFB must be connected to SDO of last PGA2310 in the chain
- Short JP6 to use volume encoder, JP7 for two pushbuttons or ctr off toggle
- PWRON is pullup for Mute inputs on PGA chips for Brown-out protection
- 10K series resistor allows for external Mute sw to Gnd
- Short across only one jumper at JP1-5 to select highest source select (one-hot)
- For all GP's as toggle, don't short any of them
